DISSERTATION

Preserving the Valuable

Abstract: Many people believe that we have a distinctive moral reason to preserve certain non-instrumentally valuable things—such as beautiful paintings, important traditions, and loving relationships—even when a superior replacement is available. G. A. Cohen dubbed this view ‘Conservatism about Value’. My dissertation offers a systematic discussion of this position, traversing normative ethics, metaethics, and bioethics. On the theoretical side, I examine what explains the presence of conservative reasons, how strong these reasons are, which things we have reasons to conserve, and who these reasons apply to. On the practical side, I argue that this view illuminates old and new puzzles concerning the shape of a life, the significance of progress, how a person should direct their life at its different stages, end-of-life choices, and the emerging technologies of life extension.
